@hOnza\_saska

Jan is a highly **technical rider**, exactly what it takes to progress in today's XCO racing and he's always looking for new ways forward, never settling for familiar routines. Without a big team behind him, he's built his own sponsorship network to fund a full World Cup season on his own.

Give him the right support, and Jan is ready to pour all his energy into racing, with his sights set on consistent top World Cup results.
